

January 2021 News

PLEASE FORWARD TO YOUR COLLEAGUES

www.wikistim.org

If you are encountering this newsletter for the first time, please visit WIKISTIM's [ABOUT](#) section, which describes the site's unique resources and is accessible without registration.

Happy New Year from Jane!

As we ring in the new year with hope in our hearts and ring out an old one we will never forget, I am grateful to all of you for your support of WIKISTIM and particularly grateful to our new donor, Dr. Kenneth Chapman; to Dr. Todd Sitzman, who has been an enthusiastic supporter of WIKISTIM from the time it was a gleam in our eyes and signals his continuing support with generous donations; and to Dr. Richard North, who has augmented his constant influx of time and attention to WIKISTIM with yet another financial donation. Thank you all for your generous contributions!

NANS 2021 Coming to us Virtually

The 24th Annual Meeting of the North American Neuromodulation Society will take place in the comfort of your homes or offices with live sessions on January 15th and 16th and on-demand viewing through April 16th. The [registration fees](#) are modest, the [speakers](#) distinguished and the [topics](#) timely. As always, attendees will have the opportunity to earn CME credits. Dr. North and Jane Shipley are pleased that two of our abstracts will be presented at this meeting: a WIKISTIM update and one on "Improving Cost-Effectiveness Models of Spinal Cord Stimulation," with our co-author, Dr. Rui Duarte.

An Additional Project for The Neuromodulation Foundation

In 2007, we published a special supplement of *Pain Medicine* that presented "Practice Parameters for the use of Spinal Cord Stimulation in the Treatment of Chronic Neuropathic Pain." The information in this [document](#), with some updates and added links to WIKISTIM.org, can be found on a [website](#) dedicated entirely to this project.

In the intervening years, the field of spinal cord stimulation has grown, not only in terms of the number of patients and clinicians but also in terms of equipment, waveforms, and even our thinking about pain/paresthesia overlap, which previously was considered a necessary but not sufficient prognostic factor for SCS success. In addition, dorsal root ganglion and peripheral nerve stimulation, which target the same primary afferents as SCS and use many of the same devices, have emerged as alternative treatments for some of the same indications.

We are pleased to report that we have received grant support from Abbott, Boston Scientific, Nevro, and Medtronic to update and expand the Practice Parameters into a more comprehensive document and supporting website entitled, "Spinal Cord Stimulation In The Treatment Of Chronic Pain: A Guide To

Current Practice.”

MEMBERSHIP

In December, the number of our subscribers grew to 1388. Thank you for helping to spread the word!

IF WIKISTIM SAVES YOU TIME. . . WIKISTIM SAVES YOU MONEY!

Contributions to The Neuromodulation Foundation are tax-deductible for United States tax-payers aged 70 1/2 who contribute directly from an Individual Retirement Account or for those who itemize deductions. A special provision of the 2020 CARES Act allows all United States tax-payers to deduct up to \$300 in charitable contributions whether or not they itemize deductions.

We welcome and acknowledge all donations. While we aren't operating at the level where we can afford to collect donations via credit cards, the PAYPAL option on the [DONATE](#) page is available for your convenience, or you may, of course, ask your bank to send a check to The Neuromodulation Foundation, Inc., 117 East 25th Street, Baltimore, MD 21218.

The Internal Revenue Service judges our suitability to continue as a 501(c)(3) non-profit charitable corporation based on the level of public support we receive. Please join the donors listed below and on our website with a contribution large or small. Please encourage institutional and corporate donors as well. We'd love to add your name and theirs to our list of financial supporters below!

Individual supporters 2019-21:

- Thomas Abell, MD
- Kenneth Chapman, MD
- Richard B. North, MD
- B. Todd Sitzman, MD, MPH
- Konstantin Slavin, MD, PhD

Industry support 2019-21:

- Medtronic
- Stimwave

Nonprofit support:

- The North American Neuromodulation Society (publicity, conference registration, grant)
- The International Neuromodulation Society (publicity and conference registration)
- The Neuromodulation Foundation, Inc. (WIKISTIM's parent organization)
