

April 2021 News

PLEASE FORWARD TO YOUR COLLEAGUES

www.wikistim.org

If you are encountering this newsletter for the first time, please visit WIKISTIM's [ABOUT](#) section, which describes the site's unique resources and is accessible without registration.

AVAILABILITY OF OPEN ACCESS/FULL TEXT PUBLICATIONS

As a service to *Neuromodulation*, the journal dedicated to our field, for years we have included links to full-text articles for each *Neuromodulation* citation, whether or not the article was available for free download. A year ago, we began to include links to all open-access publications and to indicate whether our links to *Neuromodulation* for specific citations would point to a "Free Full Text" or merely "Full Text" page. As we updated epub information from earlier months, we also added full-text links.

We realized recently that identifying some full-text links could lead users to think that we had identified all. Thus, we embarked upon a project that will take a few months to complete—adding all available full-text links. We started with the smallest sections and have completed GES, PNS, and DRG. We will next work on SCS and then SNS and DBS.

Downloading some PDFs creates a token, indicating a one-time event; other downloads occur immediately. In those cases, we add links to the full-text on the publisher's page before PDF creation. We have also discovered that some publishers are making small but significant changes in the titles of articles when they appear in print rather than as e-publications. Thus, as we have updated citations, we have had to change titles to add hyphens (or remove them), remove apostrophes, and even add new words. We consider this egregious because these publication might well have been listed as originally titled in bibliographies of other published papers.

Another thing we have discovered is that when a journal offers a free download of a paper in "accepted manuscript" format during the e-publication stage, that paper might appear behind a paywall when the paper is published in its final version. We are keeping a note of these instances and will remove "Free Full Text" links if necessary as we update e-publications.

Finally, we haven't checked the statistics, but it seems that more and more papers are being published in an open-access format, and we applaud this trend. We hope that the extra service we are providing with the Free Full Text links is helpful.

YOUR OPINION REQUESTED

Would it be useful to you to have frequently cited review articles, expert opinions, and editorials in WIKISTIM's databases for handy reference? We would include a limited number of such papers based

upon your recommendations and upon citation statistics (while continuing to include every paper that reports primary data). We would clearly mark these publications or create a special section for them, unlike PUBMED, which sometimes applies the “Reviews” label inappropriately.

In addition to your opinion about this expansion of our citation lists, we would welcome your nominations for important papers to include. An example that comes immediately to mind is our PNS editor, Tracy Cameron’s paper, “Safety and efficacy of spinal cord stimulation for the treatment of chronic pain: a 20-year literature review,” which is frequently cited, and which furthermore reported important information on the incidence of infection, which WIKISTIM can flag. This paper does not appear after a PUBMED search with the keywords, *Cameron SCS infection*.

We would greatly appreciate your opinion about this proposed expansion as well as your nomination of potential citations, via e-mail to wikistim@gmail.com.

MEMBERSHIP

In March, the number of our subscribers grew to 1454. Thank you for helping to spread the word!

CITATIONS ADDED MARCH 29, 2021 (if necessary, please click “View Entire Message”)

Deep Brain Stimulation (now 6133 citations)

If WIKISTIM SAVES YOU TIME. . . WIKISTIM SAVES YOU MONEY!

Contributions to The Neuromodulation Foundation are tax-deductible for United States tax-payers aged 70 1/2 who contribute directly from an Individual Retirement Account or for those who itemize deductions. A special provision of the 2020 CARES Act allows all United States tax-payers to deduct up to \$300 in charitable contributions whether or not they itemize deductions.

We welcome and acknowledge all donations. While we aren't operating at the level where we can afford to collect donations via credit cards, the PAYPAL option on the [DONATE](#) page is available for your convenience, or you may, of course, ask your bank to send a check to The Neuromodulation Foundation, Inc., 117 East 25th Street, Baltimore, MD 21218.

The Internal Revenue Service judges our suitability to continue as a 501(c)(3) non-profit charitable corporation based on the level of public support we receive. Please join the donors listed below and on

our website with a contribution large or small. Please encourage institutional and corporate donors as well. We'd love to add your name and theirs to our list of financial supporters below!

Individual supporters 2019-21:

- Thomas Abell, MD
- Kenneth Chapman, MD
- Richard B. North, MD
- B. Todd Sitzman, MD, MPH
- Konstantin Slavin, MD, PhD

Industry support 2019-21:

- Medtronic
- Stimwave

Nonprofit support:

- The North American Neuromodulation Society (publicity, conference registration, grant)
- The International Neuromodulation Society (publicity and conference registration)
- The Neuromodulation Foundation, Inc. (WIKISTIM's parent organization)
