NEW SCHEDULE AND GIFTS FOR THE NEW YEAR

With this first newsletter of 2022, the first published on our new mid-month schedule, it gives us great pleasure to acknowledge the recent contribution of SuEarl McReynolds. With her permission, we are reprinting Ms. McReynolds' email:

"I can't thank you enough for what WIKISTIM has meant to my family, and most specifically to my daughter. She had been having severe, chronic neck pain for several years as the result of a car accident and had tried numerous different things to make it better--but nothing worked. Her neurosurgeon thought a spinal cord stimulator would be a good possibility for helping her, but her insurance refused to cover a cervical spinal cord stimulator--although they did cover lumbar ones.

"I took on the challenge of getting them to revise their decision. I am a retired biology professor. So I have had experience reading scientific papers. WIKISTIM was literally invaluable in my initial literature search and then in keeping up with the most current articles. It was obvious that there was no basis for the selective denial of cervical spinal cord stimulators. I compiled quite an extensive bibliography for her case!

"Long story short, after almost a year of many, many communications with many individuals at the insurance company, they did approve the procedure. It was done two years ago, and it has been very successful in controlling her neck pain. Her quality of life has significantly improved, and I credit a large part of that to WIKISTIM! Thank you so very, very much for what you do."

Ms. McReynold's contribution and account of her experience with WIKISTIM were unique and important gifts. And our work on a related project allows us to make a gift to all of our readers who can now download a free PDF of our glossary of neurostimulation terminology ahead of print publication in the journal *Neuromodulation*. This glossary exists because of the volunteer efforts of a group of experts and the support of our foundation along with the Institute of Neuromodulation and the International

Neuromodulation Society. We refer to this paper as the "print edition" and expect each organization to host versions on their respective websites, where updates and additions will appear as appropriate.

UPDATING OUR PRACTICE GUIDE

Updating the glossary, mentioned above, leads directly into a note about our efforts to update our 2007 Spinal Cord Stimulation Practice Parameters. As we have mentioned in previous newsletters, the site will be expanded to cover dorsal root ganglion and peripheral nerve stimulation and will be presented as a "practice guide." In 2007, we were able to review the entire SCS literature for appropriate citation placement. Since then, we have included some important advances, but changes in technology and techniques have outstripped our efforts to the point where an entire overhaul of the site became warranted. In addition, we have linked the citations in the original website to WIKISTIM, but a closer relationship between these two major projects is possible--with, for example, links to the search pages in the various WIKISTIM sections with search terms already in place. Most of the work of this nature takes place behind the scenes until, suddenly, it is ready to be released. We look forward to that event and are grateful to the experts who are joining in this effort.

If WIKISTIM SAVES YOU TIME. . . WIKISTIM SAVES YOU MONEY!

The existence of WIKISTIM depends entirely on the support of individuals and organizations, and the Internal Revenue Service judges our suitability to continue as a 501(c)(3) non-profit charitable corporation based on the level of public support we receive. Contributions to *The Neuromodulation Foundation* are tax-deductible for United States tax-payers aged 70 1/2 who contribute directly from an Individual Retirement Account or for those who itemize deductions. While we aren't operating at the level where we can afford to collect donations via credit cards, the PAYPAL option on the DONATEpage is available for your convenience, or you may, of course, ask your bank to send a check to *The Neuromodulation Foundation, Inc*., 117 East 25th Street, Baltimore, MD 21218.
